

Will life on earth really come crashing to a halt on December 21, 2012? Will solar storms trigger devastating earthquakes and volcanoes that obliterate humankind? Will a large-scale science experiment go awry, destroying our civilization? Is Earth on a collision course with an obscure planet? Will any of these events herald the end of the world? Dr. Raymond C. Hundley analyzes the predictions of the ten most prominent apocalyptic theories in the 2012 doomsday movement. He investigates the claims of scientists, theologians, mathematicians, technologists, and ancient prophets along with the credibility and probability of each theory. The 2012 predictions of the Mayan calendar are considered alongside the parallel calculations of 16th century astrologer Nostradamus. Dr. Hundley takes a close look at the speculation originating everywhere, from evangelical Christianity to secular academia. Will the World End in 2012? Dr. Hundley's conclusion may be what you least expect. He challenges Christians to respond to these predictions not with fear, but with hope and joy. For believers and nonbelievers alike, Hundley's logical evaluation of Earth's potential demise provides a fascinating road map of where our civilization could be heading and how we can prepare our hearts and minds for what lies ahead.
