

# Growing Your Companys Leaders: How Great Organizations Use Succession Management to Sustain Competitive Advantage

Within the next few years, baby boomer leaders and managers will be retiring in huge numbers. From the executive suite on down, the challenge to put the right person in place for every job is becoming acute. The potential shortfall means organizations must put succession planning at the top of their priority lists. Growing Your Companys Leaders offers the results of a study of five global leaders in succession strategy: Dow Chemical, Dell Computer, Eli Lilly, Pan Canadian Petroleum, and Sonoco. Readers will learn what these and sixteen other high-profile organizations are doing to identify, secure, and prepare the next generation of leaders. This book examines: \* the link between succession management and business strategy \* the architecture of good plans and how technology can make them better \* the importance of individual employee development \* why senior management support is crucial \* how to monitor the effectiveness of the succession management system.
