

The Pure Running Guide for Over-Weight Parents

This book is intended to be read by a wide range of people. Maybe you are in your early thirties, possibly mid-forties, or nearing the big 50, like me. More than likely you are being stretched thin with the demands of a busy lifestyle, all too common in households of families today. There is the strong possibility of working outside the home or even from the confines of your home, daily household chores, and raising children, so naturally there is little time for yourself, much less the time it takes to devote to running and getting in shape.
