

Report on the Development of Household Finance in Rural China (2014)

The book reports on the development of household finances in rural China. It is based on the results of an on-site survey conducted door to door by a research team from the Survey and Research Center for China Household Finance, the largest survey center in China and perhaps the world that specializes in Chinese household finances. Directed by financial experts that enjoy the highest honors in their field and the largest interviewer group in China, it reveals the most realistic picture of rural China available today and highlights a topic about which people worry most: household finances. By reading this inspiring report, readers will be able to better understand China from a household finance perspective.
