

Stakeholder-Driven Strategic Planning in Education: A Practical Guide for Developing and Deploying Successful Long-Range Plans

No school district becomes excellent without a strategic plan, but many remain mediocre with them. What makes the difference? This book has been written to describe what it means to engage in serious long-range or strategic planning and to provide solutions to the inadequacies and inconsistencies found in the way school districts approach this process. The book is intended to be as practical as possible, meaning that by understanding the design and following the suggested strategic planning team activities found in each chapter, you could facilitate this process in your district. All key components are described and multiple examples are used to help the reader understand the intent of each component and how the components fit together. In addition, questionnaires and surveys are included to simplify facilitation. The basic reference used to refine the Stakeholder-Driven Strategic Planning process is the Strategic Planning Category of the Baldrige Education Criteria for Performance Excellence.
